IMPORTANT

Your Indian Motorcycle® LED Headlight Kit is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.

INSTALLATION INSTRUCTIONS
VEHICLE PREPARATION

GENERAL

1. Ensure motorcycle is parked on a flat surface, kickstand is fully extended, and vehicle is stable prior to installation.
2. Turn key or ignition switch to **OFF** position and remove key.

MODELS WITH NACELLE

For models without nacelle, skip to *Accessory Installation* section.

BOBBER NACELLE REMOVAL

1. Remove six screws Ⓐ from rear of headlight nacelle. Remove and set aside headlight nacelle Ⓑ.

ACCESSORY INSTALLATION

HEADLIGHT REMOVAL

MODELS WITHOUT NACELLE

1. Remove trim ring screw Ⓐ. Remove headlight Ⓒ and trim ring Ⓑ.

MODELS WITH NACELLE

1. Remove two trim ring screws Ⓐ. Remove headlight Ⓒ, trim ring Ⓑ and rubber surround Ⓓ.

REMOVE HEADLIGHT TRIM RING

1. Set headlight on a non-scratching surface.

2. Remove and retain four spring clips Ⓐ from trim ring Ⓑ and separate headlight Ⓒ from trim ring Ⓑ.

INSTALL LED TO TRIM RING

| IMPORTANT |
| --- |
| Set headlight parts on a soft cloth to prevent scratches to finish. |

1. Insert new LED Headlight ① into retained trim ring Ⓑ. Align tab on headlight with notch in trim ring as shown in inset.

2. Install spring clips ② one at a time.

   a. Ensure spring clip wires route around headlight locating features on edge of LED light housing ①.

   b. Using a small tipped tool (such as a standard screwdriver), press spring clip ② under outer lip of trim ring Ⓑ. Ensure center of spring clip stays aligned around metal tabs of LED light housing ①.

   c. Repeat this for all four spring clips ②.

INSTALL LED HEADLIGHT

Models with and without nacelle

1. Plug main headlight connector Ⓐ into harness connector Ⓑ. Find single brown wire Ⓒ and plug into single wire terminal Ⓓ on headlight. Single black terminal wire Ⓔ will not be used. Tape wire Ⓔ to main wire harness or tuck into headlight housing.
2. Install headlight assembly:

   - **Models with no nacelle**

     a. Pull wiring harness and connectors through headlight housing. Install headlight assembly ① onto housing and secure with retained screw Ⓐ. Torque screw to specification.
TORQUE
36 in. lbs. (4 Nm)

- **Models with nacelle**
  a. Pull wiring harness and connectors through headlight housing and out opening in back. Install headlight assembly ① onto housing and secure with two retained screws Ⓐ. Ensure rubber trim ring Ⓑ is installed between bucket and headlight. Torque screws to specification.

TORQUE
73 in. lbs. (8 Nm)

  b. Ensure wires for headlight are secured inside the bucket Ⓒ or wrapped in the harness wrap Ⓓ.
VEHICLE REASSEMBLY

NACELLE INSTALLATION

1. Install nacelle and brackets in place and secure with six retained screws Ⓐ in rear of headlight nacelle. Push nacelle up against underside of top triple clamp. Torque screws to specification.

TORQUE
84 in. lbs. (9.5 Nm)
